ABUGOV, R., Is There a Cost of Meiosis in Life History? . . 613

WILLIAMS, S. M. and STROBECK, C., Sister Chromatid Exchange and the Evolution of rDNA Spacer Length 625

Index to Volume 116

ABUGOV, R., Is there a cost of meiosis in life history?, 613
Activation energy of enzymatic charge transfer reactions, and conformational mobility of proteins; analysis in dielectric formalism, 201
Age, male, choosy females and correlates of, 349
Aggregation and hierarchical structure of ecological networks, information theoretical analysis of, 321
ALLISON, R. D., Concerning the oscillatory mechanism of Osuji for γ-glutamyl transpeptidase and the γ-glutamyl cycle (letter), 469
Amino acid residues, additivity of the free energies of association of; protein–protein interactions, 149
Antibodies, two, analyzing the joint effects of, and the design of molecularly engineered vaccines, 569
Antimetabolite 8-azaguanine during transcription, interaction energy studies of, 195
ARCURI, P. (see KALLEN, A.), 377
Avian syrinx, theoretical models of, 45
8-azaguanine, antimetabolite, during transcription, interaction energy studies of, 195

Behavior rules, coarse, on the optimality of, 161
Bhopalator: a molecular model of the living cell based on the concepts of conformons and dissipative structures, 399
Biochemical and genetic properties of oligomeric structures: a general approach, 527
Biosynthesis, impaired, of highly unsaturated phosphatidylcholines: a hypothesis on the molecular etiology of some muscular dystrophies, 65
BOOKSTABER, R. and LANGSAM, J., On the optimality of coarse behaviour rules, 161
Brain electric field at EEG and microwave frequencies, a model, 495
BRAITHWAITE, A. W. (see NAORA, H.), 313
BRUGGE, R., A mechanistic model of grass root growth and development dependent upon photosynthesis and nitrogen uptake, 443
Burkitt's lymphoma, the main cause of, and deregulation of immunoglobulin expression, 395

CASEY, R. M. and GAUNT, A. S., Theoretical models of the avian syrinx, 45
Cell enzyme, whole, immobilized, a theoretical model for, 9
Cell, living, a molecular model (bhopalator) of, based on the concepts of conformons and dissipative structures, 399
CHANG, H. N. and PARK, T. Y., A theoretical model for immobilized whole cell enzyme, 9
Charge transfer reactions, enzymatic, activation energy of, and conformational mobility of proteins; analysis in dielectric formalism, 201
Choice of mate, monogamy and mutational load, 369
Choosy females and correlates of male age, 349
Chromatid sister exchange and the evolution of rDNA spacer length, 625

Chromosomal translocation and oncogene activation; further implications of the territorial effects of genes (letter), 313
Circulation, coronary, in dog, a mechanical model of the dynamics of, 225
Coarse behavior rules, on the optimality of, 161
Coexistence of species, density-independent mortality, and non-linear competitive interactions, 479
Communication between dragonfly larvae; information content in finite sequences, 275
Competitive non-linear interactions, density-independent mortality, and species coexistence, 479
Conformational mobility of proteins and activation energy of enzymatic charge transfer reactions: an analysis in dielectric formalism, 201
Conformons and dissipative structures, a molecular model (bhopalator) of the living cell based on the concepts of, 399
Coronary circulation in dog, a mechanical model of the dynamics of, 225
Cost of meiosis in life history, 613
CUMMINGS, F. W., A pattern-surface interactive model of morphogenesis, 243
Current records, single-channel, possible forms for dwell-time histograms from, 111

DANZIGER, D. J. and DEAN, P. M., The search for functional correspondence in molecular structure between two dissimilar molecules, 215
DEAN, P. M. (see DANZIGER, D. J.), 215
Density-independent mortality, non-linear competitive interactions, and species coexistence, 479
Deregulation of immunoglobulin expression: is this the main cause of Burkitt's lymphoma?, 395
DE VIENNE, D. and RODOLPHE, F., Biochemical and genetic properties of oligomeric structures: a general approach, 527
Dielectric formalism analysis: conformational mobility of proteins and activation energy of enzymatic charge transfer reactions, 201
Dissipative structures, a molecular model (bhopalator) of the living cell based on the concepts of conformons and, 399
DNA helical parameters, eukaryotic oligomer frequencies are correlated with, 427
Dog, a mechanical model of the dynamics of the coronary circulation in, 225
Dragonfly larvae, communication between; information content in finite sequences, 275
Drug and tracer kinetics, theorems on log-convex disposition curves in, 355
DUFTON, M. J., Genetic code redundancy and the evolutionary stability of protein secondary structure, 343
Dwell-time histograms from single-channel current records, possible forms for, 111
Dynamic linear ecosystems, 89
Dynamics of the coronary circulation in dog, a mechanical model, 225

Ecological networks, information theoretical analysis of the aggregation and hierarchical structure of, 321
Ecosystems, dynamic, linear, 89
Electric field of the brain at EEG and microwave frequencies, a model, 495
Energies, free, of association of amino acid residues, additivity of; protein–protein interactions, 149

Energy of activation of enzymatic charge transfer reactions, and conformational mobility of proteins; analysis in dielectric formalism, 201
Energy, interaction, of an antimetabolite 8-azaguanine during transcription, 195
Enzymatic charge transfer reactions, activation energy of, and conformational mobility of proteins; analysis in dielectric formalism, 201
Enzyme, cell, whole, immobilized, a theoretical model for, 9
Enzymes, glycolytic, supramolecular organization of, 509
Eukaryotic oligomer frequencies are correlated with certain DNA helical parameters, 427
Evolution of rDNA spacer length, and sister chromatid exchange, 625
Evolutionary stability of protein secondary structure, and genetic code redundancy, 343

Females, choosy, and correlates of male age, 349
FIRBANK, L. G. and WATKINSON, A. R., A model of interference within plant monocultures, 291
FISCHBACH, F. A., Radii of gyration of opaque biological microparticles from light scattering, 435
Flagella, sea urchin sperm, algebraic expressions for the waveforms of, 127
Free energies of association of amino acid residues, additivity of; protein–protein interactions, 149
Frequencies, oligomer, eukaryotic, are correlated with certain DNA helical parameters, 427
FULLER, M. S. (see KIRBER, M. T.), 111
Functional correspondences in molecular structure between two dissimilar molecules, the search for, 215

GAUNT, A. S. (see CASEY, R. M.), 45
Gene conversion models, 1
Genes, further implications of the territorial effects of; chromosomal translocation and oncogene activation (letter), 313
Genetic and biochemical properties of oligomeric structures: a general approach, 527
Genetic code redundancy and the evolutionary stability of protein secondary structure, 343
γ-Glutamyl transpeptidase and the γ-glutamyl cycle, concerning the oscillatory mechanism of Osuji for (letter), 469
Grass root growth and development dependent upon photosynthesis and nitrogen uptake, a mechanistic model, 443
Growth, grass root, and development dependent upon photosynthesis and nitrogen uptake, a mechanistic model, 443

HANNON, B., Linear dynamic ecosystems, 89
HARVEY, I. F. (see ROWE, G. W.), 275
Helical parameters of DNA correlate with eukaryotic oligomer frequencies, 427
Hierarchical structure of ecological networks, information theoretical analysis of the aggregation and, 321
HIRATA, H. and ULANOWICZ, R. E., Information theoretical analysis of the aggregation and hierarchical structure of ecological networks, 321
History, life, is there a cost of meiosis in?, 613

HOLT, R. D., Density-independent mortality, non-linear competitive interactions, and species coexistence, 479
HOROWITZ, A. and RIGBI, M., Protein–protein interactions: additivity of the free energies of association of amino acid residues, 149
HWANG, R. H., A lignification mechanism, 21

Immobilized whole cell enzyme, a theoretical model, 9
Immunoglobulin expression, deregulation of, and the cause of Burkitt's lymphoma, 395
INFANTE, J. P., Impaired biosynthesis of highly unsaturated phosphatidylcholines: a hypothesis on the molecular etiology of some muscular dystrophies, 65
Information content in finite sequences: communication between dragonfly larvae, 275
Information theoretical analysis of the aggregation and hierarchical structure of ecological networks, 321
Interacting surfaces of proteins, searching for; the improved method, 607
Interaction energy studies of an antimetabolite 8-azaguanine during transcription, 195
Interactions, competitive, non-linear, density-independent mortality, and species coexistence, 479
Interactions, protein–protein: additivity of the free energies of association of amino acid residues, 149
Interference within plant monocultures, a model, 291
Ionic events: their role in the triggering of phagocytosis (letter), 475

JI, S., The bhopalator: a molecular model of the living cell based on the concepts of conformons and dissipative structures, 399

KALLEN, A., ARCURI, P., and MURRAY, J. D., A simple model for the spatial spread and control of rabies, 377
Kinetics, tracer, theorems on log-convex disposition curves in drug and, 355
KIRBER, M. T., SINGER, J. J., WALSH, J. V., JR., FULLER, M. S. and PEURA, R. A., Possible forms for dwell-time histograms from single-channel current records, 111
KOOPMAN, J. S., Analyzing the joint effects of two antibodies and the design of molecularly engineered vaccines, 569
KRISHTALIK, L. I., Conformational mobility of proteins and activation energy of enzymatic charge transfer reactions: an analysis in dielectric formalism, 201
KURGANOV, B. I., SUGROBOVA, N. P. and MIL'MAN, L. S., Supramolecular organization of glycolytic enzymes, 509

λDNA arrangement in the viral particle, a model, 587
LANGSAM, J. (see BOOKSTABER, R.), 161
Larvae, dragonfly, communication between; information content in finite sequences, 275
LENNON, G. G. and NUSSINOV, R., Eukaryotic oligomer frequencies are correlated with certain DNA helical parameters, 427
LEVY, B. I., TEDGUI, A. and MICHEL, J. P., A mechanical model of the dynamics of the coronary circulation in dog, 225

Life history, is there a cost of meiosis in?, 613
Light scattering and the radii of gyration of opaque biological microparticles, 435
Lignification mechanism, 21
Linear dynamic ecosystems, 89
Log-convex disposition curves in drug and tracer kinetics, theorems on, 355
Lymphoma, Burkitt's, the main cause of, and deregulation of immunoglobulin expression, 395

McLEAN, K. R. and MANNING, J. T., Mate choice, monogamy and mutational load, 369
Male age, choosy females and correlates of, 349
MANNING, J. T., Choosy females and correlates of male age, 349
MANNING, J. T. (see McLEAN, K. R.), 369
Mate choice, monagamy and mutational load, 369
Meiosis in life history, is there a cost of?, 613
MICHEL, J. P. (see LEVY, B. I.), 225
Microparticles, biological, opaque, radii of gyration from light scattering, 435
MIL'MAN, L. S. (see KURGANOV, B. I.), 509
MIYAHARA, K. (see NAORA, H.), 313
Molecular etiology of some muscular dystrophies; impaired biosynthesis of highly unsaturated phosphatidylcholines, 65
Molecular model (bhopalator) of the living cell based on the concepts of conformons and dissipative structures, 399
Molecular structure: the search for functional correspondences between two dissimilar molecules, 215
Molecularly engineered vaccines, the design of, and the joint effects of two antibodies, 569
Monocultures, plant, a model of interference within, 291
Monagamy, mate choice, and mutational load, 369
Morphogenesis, a pattern-surface interactive model, 243
MORPURGO, G., Deregulation of immunoglobulin expression: is this the main cause of Burkitt's lymphoma?, 395
Mortality, density-independent, non-linear competitive interactions, and species coexistence, 479
MURRAY, J. D. (see KALLEN, A.), 377
Muscular dystrophies, a hypothesis on the molecular etiology of; impaired biosynthesis of highly unsaturated phosphatidylcholines, 65
Mutational load, mate choice, and monogamy, 369

NAORA, H., MIYAHARA, K. and BRAITHWAITE, W. A., Further implications of the territorial effects of genes: chromosomal translocation and oncogene activation (letter), 313
Networks, ecological, information theoretical analysis of the aggregation and hierarchical structure of, 321
Nitrogen uptake, a mechanistic model of grass root growth and development dependent upon photosynthesis and, 443
NUSSINOV, R. (see LENNON, G. G.), 427

OHTA, T. (see WEIR, B. S.), 1
OJHA, R. P. (see SANYAL, N. K.), 195
Oligomer, eukaryotic, frequencies are correlated with certain DNA helical parameters, 427
Oligomeric structures, biochemical and genetic properties of; a general approach, 527
Oncogene activation and chromosomal translocation; further implications of the territorial effects of genes (letter), 313
Organization, supramolecular, of glycolytic enzymes, 509
Oscillatory mechanism of Osuji for γ-glutamyl transpeptidase and the γ-glutamyl cycle (letter), 469
Osuji oscillatory mechanism for γ-glutamyl transpeptidase and the γ-glutamyl cycle (letter), 469

PARK, T. Y. (see CHANG, H. N.), 9
Pattern-surface interactive model of morphogenesis, 243
PEURA, R. A. (see KIRBER, M. T.), 111
Phagocytosis, role of ionic events in the triggering of (letter), 475
Phosphatidylcholines, highly unsaturated, impaired biosynthesis of; a hypothesis on the molecular etiology of some muscular dystrophies, 65
Photosynthesis and nitrogen uptake, a mechanistic model of grass root growth and development dependent upon, 443
Plant monocultures, a model of interference within, 291
Protein conformational mobility and activation energy of enzymatic charge transfer reactions: an analysis in dielectric formalism, 201
Protein secondary structure, genetic code redundancy and the evolutionary stability of, 343
Protein–protein interactions: additivity of the free energies of association of amino acid residues, 149
Proteins, searching for interacting surfaces of; the improved method, 607

Rabies, a simple model for the spatial spread and control of, 377
RABCZENKO, A. (see ZIELENKIEWICZ, P.), 607
Radii of gyration of opaque biological microparticles from light scattering, 435
